ASSIGNMENT - 4

QUESTION :

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cms send “alert” to IBM cloud and display in device recent events.

CODE :

```

Code simulation on wokwi

Data sent to IBM Cloud with distance

The screenshot shows the IBM Watson IoT Platform dashboard. The 'Recent Events' tab is selected, displaying a table of events. The table has four columns: Event, Value, Format, and Last Received. The events show a continuous stream of distance measurements.

Event	Value	Format	Last Received
distance	{"distance":141.32}	json	a few seconds ago
distance	{"distance":141.32}	json	a few seconds ago
